

OLATION[®]

What is Olation?

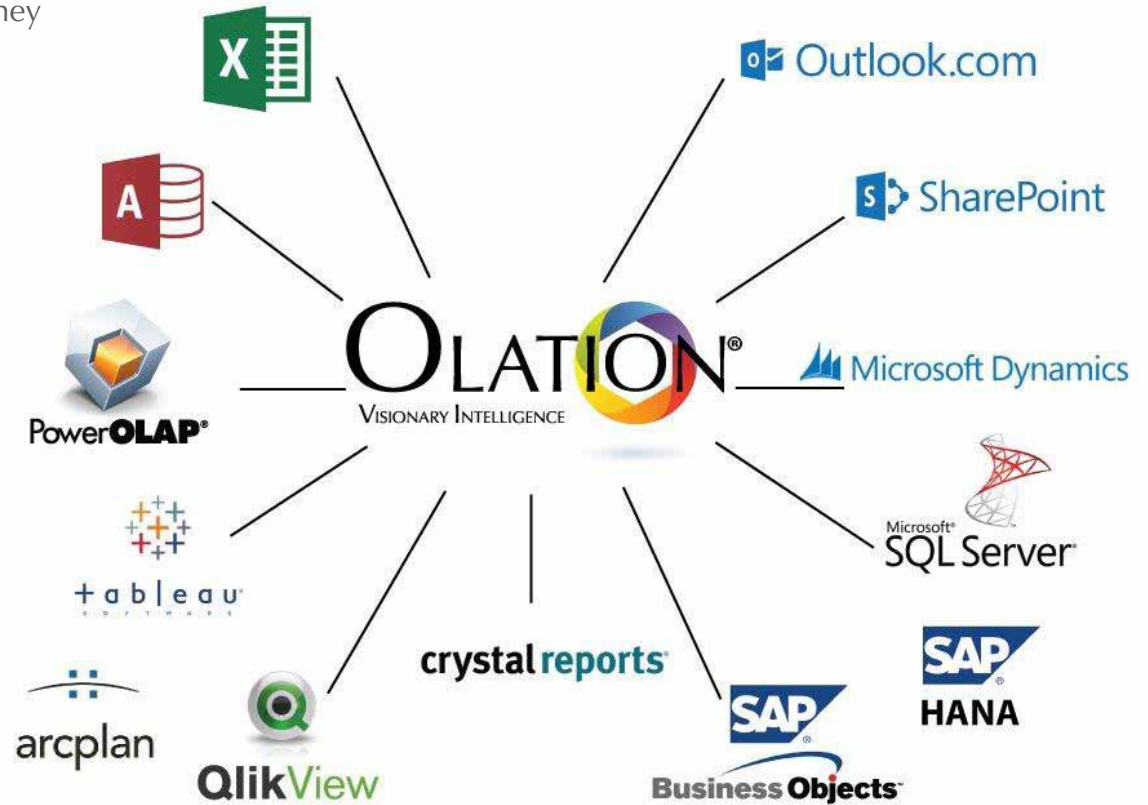

Benefits of using Olation
What Olation can do for You

Olation Software – What is it?

OLATION works with database systems like MS SQL Server to deliver real-time data to people where they need it most their own tools. Users stay with their existing applications, but work with data directly from the source.

Executives measure real-time business performance against the company vision, to target maximum profitability. IT maximizes data security add control while providing real-time data and a friendly interface for analysis.

Olation is a one-stop solution for your data management needs.

Olation fuses relational and OLAP technologies and connects with tools that are already in place: SQL Server, MySQL, SAP HANA, Oracle, Excel, Access, Report writers, CRM, Outlook, Web platforms, and Dashboards

Benefits of using Olation

Relational database systems are well-tuned to store transaction records and produce reports but, they are not effective at providing flexible, time-sensitive analytical information or unique reports at a moment's notice.

Olation acts as the nexus in unifying the relational world and your customers front-end applications. A fast Olation installation will yield immediate results, saving a tremendous amount on cost.

Benefits of using Olation:

- Use Excel as a dynamic interface to work with live data
- Lightning fast calculations with the Olation calculation engine.
- LIVE real time online data sharing.
- Multi-Company Consolidations
- Strategic Planning
- Maximizing Profitability
- Dashboards, KPI's and Reports
- Predictive Analytics
- Modify relational data

Real-Time BUSINESS IMPACT with a SINGLE SOLUTION

Put the Vision in Visionary

- Olation enables leaders to envision future success.
- Communicate that vision to their organization.
- Dynamically measure performance against that vision.

Close the Gap

- Olation captures data in one place, including the “plan” data that management uses to run the business.
- Olation is a collaborative solution that leverages investments in current systems, as well as the skills your staff already has in Excel.
- There is a new way to close the gap between so many different systems.

Complete Database Solution

- Olation provides dynamic Financials and beyond. Think Inventory Planning, Driver-based Budgeting, and Asset Optimization.
- Olation ensures the control, data integrity, and security your systems require.

What Olation® Can Do For You:

Managers

Get instant insights and accurate results with Olation

The “instantaneous data updating” delivers accurate data, so you can make effective real-time decisions. Real, real-time data information is now in your hands.

IT Professionals

Meet all your technical requirements. Exceed management’s data demands

Olation seamlessly integrates with multiple databases systems and is easily scalable.

Excel-Users

Eliminate Drudgery, Create Value

Olation is end-user friendly, Excel will remain one of your front-end options as the dynamic interface to reports as well as models that you develop for your business.

Olation delivers business model results instantaneously as new transactions are added or as plan numbers are entered in Excel—database size does not matter.

ERP Systems

Live Data-based Business Modeling for Your ERP System

Olation powers your system with dynamic, instant data—nothing like traditional BI.

Olation’s cost effectiveness is powered by its simplicity and quick implementation.

Olation dynamic and instantaneous, facilitating high productivity.
